OBJECTIVE

Seeks to generate superior risk-adjusted investment performance over a full market cycle relative to the Russell Mid Cap® Growth Index

HIGHLIGHTS

- Leverages same process used in managing Small Cap Growth strategy since 4/2005 and Small/Mid Cap Growth strategy since 1/2012
- Seeks to identify under-exploited, high-growth, mid-cap companies with positive fundamentals and attractive risk/reward profiles
- Our goal is a lower volatility approach to high growth investing
- Active stock selection primarily drives returns by focusing on what we define as high quality “emerging winners” that may benefit from secular growth stories
- Bottom-up portfolio construction is based on fundamental research and discounted cash flow valuation analysis
- Idea generation includes an internally developed growth screen
- Risk management approach integrated throughout the process, including a clear stop/loss discipline to help manage downside risk
- Turnover typically 30-80%
- Typically 45-55 stocks; position size: typically 1% to 4%
- Sector weightings limited to +/- 50% of sectors greater than 10% of benchmark allocation
- Stock selection focuses primarily on companies with a market capitalization between \$8.0 to \$30.0 billion (at purchase); not to exceed market cap maximum for the benchmark
- Recent IPOs and early-stage (unprofitable) companies are limited* in the portfolio

KEY RISKS

Equity Risk, Market Risk, Non-US Securities Risk, Liquidity Risk. Investing involves risk including possible loss of principal.

Due to rounding, Market Capitalization and Sector Distribution totals may not equal 100%. This portfolio is actively managed and characteristics are subject to change. Top 10 Holdings may combine more than one security from the same issuer and related depository receipts. Portfolio weight calculations include accrued interest. Holdings are based on total gross assets before any fees are paid; any cash held is included. Reference to specific securities or holdings should not be considered recommendations for action by investors. There is no guarantee the account continues to invest in the securities referenced. Cash may include unsettled trades, fees and/or derivatives. Median Active Share (since inception) indicates the proportion of the portfolio's holdings (by market value) that is different than the benchmark. A higher active share indicates a larger difference between the benchmark and the portfolio.

Characteristics are shown for a representative account. Due to systems limitations, it is difficult to analyze characteristics on a composite basis. The representative account was selected because it closely reflects the Loomis Sayles Mid Cap Growth investment strategy. Due to guideline restrictions and other factors, there is some dispersion between the returns of this account and other accounts in the Composite.
